NOTE: The higher the number, the higher the Priority
 (Add second digit below to each ten digit above for project priority rating)

- 7. Approaches 5. Taxiways 3. Access 1. Other (service roads, fencing, etc.)
- 6. Runways 4. Aprons 2. Equipment/storage

Any minor work associated with an improvement item receives the same ranking as the major item. Examples are:
 Work for a runway extension ranks a "46", lighting the apron ranks a "54", reconstruct taxiway ranks a "55", Runway overlay ranks a "46", tree removal on an approach ranks a "57", etc.

NOTE: The above priority system is used for projects needing attention during the current fiscal year. Any project that is considered being needed in a future year will be given a priority rating of 10. Projects already completed will use the above rating; however, only projects completed within the last 3 years of the date of the grant meeting will be considered without special justification.

SPECIAL NOTES:

* Sponsor's that apply for a state grant for a community hangar or a fuel facility need to attach a business plan to the grant application for the project to be considered.

1. Aeronautics Commission staff will help establish the priority rating for projects not listed.
2. Ineligible projects include: aerial spray pads, airport liability insurance premiums, interest payments, private aprons, and privately owned hangars.
